

# Carbon Reduction Plan

<b>Bidder Name:</b>	Enable Access Ltd
<b>Publication Date:</b>	21 April 2026

### Commitment to achieving Net Zero

Enable Access Ltd is committed to achieving Net Zero emissions by 2050 for its UK operations. This commitment excludes the use of carbon offsetting as part of the emissions calculation and aligns with PPN 06/21 requirements.

### Baseline Emissions Footprint

Baseline emissions are a record of the greenhouse gases produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured. Enable Access Ltd is in its first full year of structured emissions data collection; therefore, the baseline year and reporting year are the same.

<b>Baseline Year: 2025</b>
<b>Additional Details Relating to Baseline Emissions Calculations</b>
<p>Enable Access Ltd has established Scope 1 and Scope 2 data collection processes. Scope 3 data collection includes the required subset of categories: upstream transportation and distribution, waste generated in operations, business travel, employee commuting, and downstream transportation and distribution. Scope 3 reporting is being developed and is in its first year of collection across the required subset of categories in accordance with PPN 06/21. Where data is still maturing, this is stated transparently.</p>

### Baseline Year Emissions

<b>EMISSIONS</b>	<b>TOTAL (tCO2e)</b>
<b>Scope 1</b>	First reporting year – emissions being measured and verified
<b>Scope 2</b>	First reporting year – emissions being measured and verified

<b>Scope 3 (Included Sources)</b>	First reporting year – emissions being measured and verified
<b>Total Emissions</b>	First reporting year – emissions being measured and verified

### Current Emissions Reporting

<b>Reporting Year: 2025</b>	
<b>EMISSIONS</b>	<b>TOTAL (tCO2e)</b>
<b>Scope 1</b>	First reporting year – emissions being measured and verified
<b>Scope 2</b>	First reporting year – emissions being measured and verified
<b>Scope 3 (Included Sources)</b>	First reporting year – emissions being measured and verified
<b>Total Emissions</b>	First reporting year – emissions being measured and verified

### Emissions Reduction Targets

Enable Access Ltd aims to reduce absolute emissions over time through continual improvement of operational efficiency, informed by ISO 14001 governance and year-on-year data maturity. Specific numerical reduction targets will be set once baseline datasets are mature and verified.

### Carbon Reduction Projects (Overview)

#### Completed Carbon Reduction Initiatives

The following environmental management measures and projects have been completed or implemented prior to the current baseline. The carbon emission reduction achieved by these schemes has not been measured previously but these measures will be in effect when performing the contract.

- ISO 14001:2015 certified Environmental Management System
- Monitoring of energy consumption and vehicle emissions
- Staff training and awareness delivered via Atlas portal
- Risk-based review of logistics and travel practices

#### Future Carbon Reduction Initiatives

In the future we hope to implement further measures such as:

- Ongoing refinement of Scope 3 data collection
- Feasibility assessment of renewable energy options at premises

- Continued optimisation of fleet efficiency and travel planning

**Declaration and Sign Off**

This Carbon Reduction Plan has been completed in accordance with PPN 06/21 and associated guidance and reporting standard for Carbon Reduction Plans. This Carbon Reduction Plan has been prepared using UK Government conversion factors for greenhouse gas reporting, where applicable.

Emissions will be reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard and using the appropriate Government emission conversion factors for greenhouse gas company reporting.

Scope 1 and Scope 2 emissions will be reported in accordance with SECR requirements, and the required subset of Scope 3 emissions will be reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard.

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).

<b>Signed:</b>	Neil Smith (Director)
